

Clay County, We Are Growing!

We are excited enrollment of the local students has steadily increased over the past eight years and is now at 125. There was one major jump when our elementary school reopened in the fall of 2015. Since then, there has been a steady increase each year. At this rate, we pray to reach our goal of 200 or more local students within four years. This is almost half of the school's total enrollment capacity of 450 students.

The entire student body is positively impacted by the presence of our local students in the classroom. Every student adds to the diversity of our campus, and it helps prepare them for their post-secondary and workplace experiences. OBI is also excited to have its dorms open again and we look forward to what the Lord has in store for all our students this coming year as we continue to share the message of Christ's love with them.

Following the dream of our founder James Anderson Burns, it is our privilege to provide a distinctly Christian education in Clay County, and help the students build relationships that are truly unique in the state of Kentucky!
